To Whom it May Concern:

I am a sixth grader at J.H. Workman Middle School in Pensacola, Florida. In my Career Discovery course, we are learning about careers and educational opportunities. After graduation from high school, I would like to attend Florida State University and work toward a degree in music. My grandmother graduated with a Master's degree in music from FSU and I would like to do the same.

I would like information on how to prepare for a career in music. I am now taking Chorus at my middle school and am involved in Pensacola Children's Chorus after school. Since I have six more years before I graduate from high school, I would like to know how I can best prepare myself for your academic program in music. Please send me information on which courses I should take in order to be admitted to the FSU College of Music.

Thank you for your patience in reading my letter and your help in preparing for college. I look forward to hearing from you and working toward attending FSU in the future.

Sincerely,

Michael Carey
